

- Installation and wiring of luminaire must be in accordance with all applicable local codes.
- Installation, inspection, and maintenance of luminaires should be performed by a qualified electrician.
- DO NOT make or alter any open holes in the luminaire. Do not modify the luminaire.
- DO NOT install damaged product.
- Make sure electrical power is OFF before and during installation and maintenance.
- Make sure the equipment is properly grounded.
- Make sure the supply voltage is same as the rated fixture voltage.

Tracking and luminaire:

First trunking rail should have one side connecting plate/last trunking rail with no connecting plate on both sides, then fix the Luminaire to trunking rail then lock holder, then keep end caps at both sides.

8-core trunking rail

Wire diagram of triple circuits function

This Triple Circuits function offers to control lighting ON/OFF by three switches SW1, SW2, SW3 which are connected by live lines L1, L2, L3

Pendant and mounting installation

Starting installation distances point should be 800 mm to 1000 mm, then in between 1st & 2nd point should be 3000 mm max

Four options for installation

Safety notes:
Installation should be performed only by
qualified electrician .

- Make sure no voltage while installation .
- Connect cable wires according to wire labeling .
- Max current should not exceed 16A in one power feed in circuit.

LED linear lighting System composition

Terminal module:

Terminal module can be independently installed as
a single unit, it also can be connected at end of one
linear light row.

Step 1 Mounting Suspension

Drill a hole on ceiling

Adjust length of suspension cord:
a. press down Hexagon bolt;
b. Pull in/out cord to adjust length

Step 2 Connecting Power Supply

Step 3 Mounting Luminaire

Slide knob to select phase L1/L2/L3

Make sure male & female connectors
in right position then fix the luminaire
to trunking rail
