

# **Product Introduction**

Solar light is an electric lamp which converts light energy into electricity by solar panels. The advantage of the product is no wiring, easy to installation and without electricity . In the day, solar panel absorbs the sun's light and convert to electricity and store in batteries. At night, the light will turn on automatically.

## Parameter

Rated Power	3W/5W	
Lighting Mode	Human Sensor	
Solar Panel	Polycrystalline 5.5V 1.8W/5.5V 3W	
Battery Type	Lithium-Ion 3.7V 2AH/3.7V 4AH	
Material	Aluminum+PC	
IP Rating	IP65	

# **Functional Description**

Detecting Distance: 10-16ft Detecting Angle: 125°

Turn on low-light mode when the light is low.

# Model 02

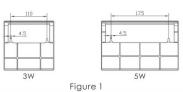

When someone comes near at night, Automatically switch to bright light

## Model 3

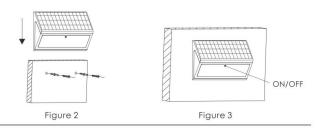

When people leave, turn back to low light mode, save electric energy.

# Installation Guide

- Choose flat walls with plenty of sunlight
   Drill two holes in the wall. The hole spacing is shown in Figure 1.

- 3. Secure the expansion tube and screws to the wall. (Note: There is a 5mm gap between the screw and the wall, which is convenient for hanging lights.) (See figure 2)
- 4. After hanging the lamp body, turn on the switch and the installation is complete. (See Figure 3)

- 1. It is recommended to turn off the light and charge it under direct sunlight for 1-2 days before the first use. Make sure the product has enough power.

  2. If you want to check whether the product can work normally or not,
- please turn it on by pressing the switch button, then cover the solar panel with your hands in the daytime or put it in a dark environment.
