

SMART SWITCHES

The smart transmitters that combine battery-free EnOcean technology with the wireless transmission standard Bluetooth Low Energy (BLE), thus effectively conserving resources: With EnOcean technology, the transmitters generate the energy required for the wireless impulses kinetically – no external power supply is necessary. Therefore, they can easily be installed virtually everywhere, whether by screwing them to a wall box or simply by attaching them to smooth surfaces using the supplied adhesive pad. White color. driver.

Item code	**86.WS01.0000.01**
Product type	**Indoor**
Category	**Drivers & Components**
Family	**CASAMBI COMPONENTS**
Subfamily	**SMART SWITCHES**
