

PoE Gateway

The POE Smart Gateway is the core control unit of the ZFANSX lighting control system. Powered via Power over Ethernet, it ensures stable and secure communication between control panels, sensors and actuator modules, enabling centralized management of lighting circuits, scenes and automation. Power supply mode: 220V~50Hz/standard POE power supply Operating temperature: -10~40 ℃; Operating humidity: 0-95% RH, no condensation Communication protocols: ZigBee 3.0, Bluetooth WIFI Networking method: wired RJ45, WIFI connection

Dimensions	
Product dimensions (mm)	(L) 86 * (W) 90 * (H) 33.6mm

Item code	PE-ZNWG01M21
Product type	Smart
Category	Drivers & Components
Family	Central Controls & Gateways
Subfamily	PoE Gateway
Pictograms	

Product	
Colour	Black
