Screw		X4

2

First select the place to be installed, place the ceiling bracket in the mounting position, and mark it with a pen core.

Then drill holes for screw A of the corresponding size. If you need to hide the outlet, An AC line control needs to be reserved in the middle of the ceiling.

3

Insert screw A into the hole

4

Take out 4 screws B and use a screwdriver to fix the ceiling bracket to the ceiling.

5

1. Connect the ceiling AC wire to the plate terminal, wiring method: (L-live wire) (N-neutral wire) (-ground wire)

2. Hang up the anti-fall rope

6

Lift the frame of the lamp and align the four notches with the four installation pillars of the ceiling bracket.

7

Rotate the frame of the lamp clockwise so that it locks into place with the ceiling bracket.

8

Make sure that the frame of the lamp is securely attached to the ceiling bracket.

9

After installation, turn on the power and light up the lamps.
